Forget Botox and fillers, Sofwave is the hottest facial treatment to book in 2023, perfect for both men and women. Try the new non-invasive, FDA-cleared ultrasound technology at Erickson Cosmetic Dermatology to treat fine lines, wrinkles, and loose skin on the face and neck. The surface of the skin is unaffected, so there's no downtime, and you'll see results, including lifted eyebrows and sharper cheekbones, after just one session. Sofwave is great for all skin tones and triggers a powerful boost of new collagen production, so full results take a couple of months to manifest. Your smoother, plumper visage can last for one to two years. 737 N Michigan Avenue #905, ericksondermatology.com
